- It can shorten product development cycle times.
- Because you will be able to control packaging even at load levels!
- Because you will be able to grow with your customers!
- Because you deserve the AWARDS!

“Whether it is in production, in production planning or in the entire logistics—due to be.as ERP/SCM automotive and SAP Business One, we are able to automate all sustainable core business processes which the automotive supplier can simply use to save time and money, or to secure competitive advantages.”

Pawel Kaczowski, CIO, Dr. Freist Automotive GmbH(DFA)

“The presentation of the system and references convinced us. The easily understandable and modern user interface, the architecture of the database and software as well as the possibility of virtualization were also reasons for our decision.”

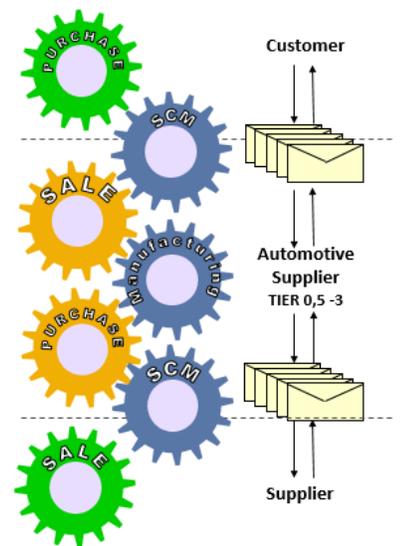

Manuel Budenbender, Manager IT, Muhr Metalltechnik

How quickly can your business react to the high demands of the automotive industry?

SCM Supply Chain Management
Automotive

SAP® Business One

SAP Business One is used by over 60,000 companies and is the leading small to midsize global business management system.

BlueOceanAutomotive with SAP Business One and SCM, can help your business run smoothly and quickly to meet the high demands of the automotive industry.

Blue Ocean Systems is a full service, global provider of end-to-end business solutions. Blue Ocean Systems was formed the year Blue Ocean Strategy, a business management book released in 2005. *Value Innovation* is the cornerstone to creating blue oceans of opportunity. It is the primary driver for everything we do

Since then, we have successfully transitioned both small and large companies to modern business platforms both locally and internationally with speed and high quality.

We have built an organization from the ground up to deliver quality, drawing on our deep experience from other firms and leveraging the business networks we each bring.

Are you meeting your delivery requirements?

Are you exceeding the quality standards?

Are you meeting your customer's demands?

How is your supply chain visibility?
